Project “Understanding household energy consumption”

Prof. Suren Erkman

Events

Marlyne Sahakian presented a paper co-authored with Béatrice Bertho and Suren Erkman at the Journées Internationales de Sociologie de l'Energie, taking place in Tours (France) from July, 1 - 3, 2015. The paper is titled: "Norms, emotions and social practices: conceptual and methodological considerations towards reduced household electricity consumption » and presents the conceptual framework and research design for the NRP 71 project: Towards more efficient household electricity consumption: Understanding social practices, uncovering norms and values, and learning how to change: www.socio-energie2015.fr

Varia

The SIG Fund has awarded the University of Lausanne and Tako/Happy City Lab an additional grant to further explore participatory methods and ethnographic research related to reducing energy consumption in Geneva, and linked to the NRP 71 project: Towards more efficient household electricity consumption: Understanding social practices, uncovering norms and values, and learning how to change.
